# CCTV - A Trail of Images

Deptford Bitnik and iMediengruppe Bitnik present

CCTV: A Trail of Images

After a short introduction to Sousveillance and CCTV film making, we will set out on a walk through Deptford and South London. Equipped with CCTV video signal receivers we will let the incoming surveillance camera signals lead us through the city. The CCTV video signal receivers will catch surveillance camera signals in public and private spaces and make them visible: surveillance becomes sousveillance. By making images visible which normally remain hidden, we gain access to the "surveillance from above" enabling us to use these images for a personal narrative of the city.

Workshop with construction manual for later DIY!  
Attendance free

Next Dates:

Kunst Halle St. Gallen, Switzerland

Saturday, 30 May 2009

Kunstraum Waloleturm Zürich, Switzerland

Tuesday, 09 June 2009

plug in! Basel, Switzerland

Saturday, 20 June 2009

A/V cables to connect between output device and wireless surveillance receiver

Output/Recording device: DV-camera or small TV device, both with audio/video-in (A/V-in)

Rechargeable battery pack (6-12V, according to type). Check how much power your receiver consumes (if your receiver consumes 300 mAh and your battery pack has a total of 1200 mAh, your setup will last for 4h)

2.4GHz 4 channel wireless camera receiver (on eBay for US\$20, from Maplin around £ 29)
